Welcome to my manual repository.

It is true I am insane, read more about it at www.microdiscray.com

I am now using the services from www.stopforumspam.com , Project Honneypot and Spamhouse in order to stop unwanted spammers and similar things.

If you are rejected in error, please contact them to get de-listed.

Here you find various types of users and service manuals, everything from electronics, ham, audio, motor etc.

Please check under NEWS

Please note, if you don't reply to the confirmation e-mail after you registered within one week, your registration will be deleted.

I will also delete any users trying to register with "funny" email addresses and usernames (mostly pornographic and similar ones)

If you have a manual, please upload it, and make it available to the public.

All manuals on this site is available for free, the only catch is that I want you to register first.

Welcome to EBAMAN

There is a limit on how many manuals you can download each day, this is because I want to make it a little bit harder for all manual scammers that sells CD's/DVD's on ebay and similar sites.

If you have a large bunch of manuals you want to up-load please contact me directly, and I can set up a temporary FTP-account for you.

I have virtually unlimited amount of discspace and bandwidth available.

Currently 20110111:

Disc-space: 775 GB available .

Transfer: 7500 GB/Month.

My Host ([servage](#)) is sitting on a couple of large pipes, so speed should not be an issue.

If you want cheap and reliable hosting, please use this [ticket](#) with [servage](#) (and I'll get a month or so free hosting).

Please report anything that doesn't seem to work OK.

Look under Help if you experience any problems.

Welcome to EBAMAN

Best Regards

Tomas Larsson

If anyone wants to contribute or have other great ideas/knowledge for the site itself (not uploading stuff), please [Contact](#) me.
