## DC POWER SUPPLY

No. 56386

Operates on standard 117VAC 50/60 cycles per second AC power and delivers one of four filtered DC voltages at 150 milliamps. (4.5V, 6V, 9V, or 12V)

1. Make sure selector switch is:  
OFF before plugging into wall  
OFF when not in use  
OFF when wiring up the output connections
  2. When 4.5V or 9V are needed put selector switch up and voltage switch to right (9V) or left (4.5V).
  3. When 6V or 12V are needed, put selector switch down and voltage switch to right (12V) or left (6V).
  4. Pilot light will be on when unit is on.
